This supplemental material has been provided by the authors to give readers additional information about their work.

## **eMethod. Method For the Research and Selection of Articles**

In PubMed website (<https://pubmed.ncbi.nlm.nih.gov/>), we conducted the following research:  
(« physician's choice » OR « physicians' choice » OR « physician choice » OR « investigator's choice » OR « investigators' choice » OR « investigator choice ») AND (« randomized » OR « randomised »)

The research was conducted on September, 1<sup>st</sup>, 2021  
All the data were coded independently by two reviewers (TO, AH).

Inclusion criteria:

- randomized trials studying anticancer intervention
- Using of the word “physician's choice” OR “investigator's choice” in either the title or the abstract

Exclusion criteria:

- Non-oncology topic
- Not assessing anticancer drug (supportive care, surgery)
- Other than single randomized trial (commentary, perspective, single-arm trial, reviews, cost-effectiveness analysis, analysis of multiples RCTs, meta-analyses, others)
- Re-analysis or subsequent publication of a trial
- Words “physician's choice” OR “investigator's choice” not used to refer to treatment arms
